Adina Ioana Vălean' hearing

European Commissioner for Transport

Key takeaways on transport

- Rail is at the centre of multimodality and sustainable transport.
- More investment in rail is needed.

- More investments in recharging and refueling points.
- Road safety will be high on the agenda, with the aim of reducing the number of fatalities on the road and internalizing the road safety pledge.

- Reduction of free allowances for aviation in the EU Emissions Trading System and making sure the sector complies with Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA).
- Introduction of (extra) taxation measures is not excluded.

- Continuation of work within the International Maritime Organization to find global solutions to the emission problems.
- Extension of the EU Emissions Trading System to the maritime sector.
